

## MyHealth has partnered with Apollo Hospitals

We are pleased to announce that MyHealth Centre and Apollo Hospitals Enterprise Limited have agreed to a collaborative partnership that will enhance delivery of healthcare services for the patients and families they respectively serve.

**The purpose of this partnership is to provide our patients with international coordinated care**, particularly for those who travel to and from India. This will enable both parties to offer better patient experiences and outcomes.

The following will guide this partnership between the two parties:

- MyHealth and Apollo physicians will identify appropriate patients, advise them of options for care, and direct them to a Single Point of Contact (SPOC) for MyHealth clinics in Ontario and Apollo hospitals in India.
- Patients can access care at the closest MyHealth or Apollo facility relative to their location.
- As the teams become more familiar with each other, they will plan exchange programs for staff, with a focus on continuing education and professional development.
- Explore areas where Apollo and MyHealth physicians can do joint research for publication.

**About Apollo Hospitals Enterprise Limited:** Established in 1983, Apollo was India's first corporate hospital, which pioneered private healthcare in the country. Since then, Apollo has emerged as Asia's foremost integrated healthcare services provider, now with 70 hospitals, 55 specialties, 7,500 clinicians, 10,000 nurses and 4,600 paramedics serving more than 50 million patients from 140 countries.

They have a robust presence across the healthcare ecosystem, including hospitals, pharmacies, primary care and diagnostic clinics. They also have telemedicine units across 10 countries, health insurance services, global projects consultancy, medical colleges, Medvarsity for E-learning, colleges of nursing and hospital management, and a research foundation. In addition, "ASK Apollo" – an online consultation portal and Apollo Home Health provide the care continuum.
