MyHealth is now WELL Health Diagnostic Centres. We're the same team with a new name, providing the highest standard of accredited patient care!

- All our services require a scheduled appointment.
- Please provide at least 24 hours' notice if you need to reschedule your appointment to avoid a no-show fee.
- For location details, or to chat live and book your appointment online, please visit [WELldiagnostics.ca/locations](https://www.welldiagnostics.ca/locations).
- **We will send your diagnostic report to your referring HP (healthcare provider),** who will follow-up with you. We can send it to additional HPs upon your request.

FLUOROSCOPY PRE-PROCEDURE INSTRUCTIONS

- Please arrange for a person to bring you to your appointment and take you home post-procedure.
- Please arrive 15 minutes before your scheduled appointment. The procedure will take approximately 30 minutes.
- Please bring your valid health card, any relevant WSIB information (claim number, date of injury and site of injury), and all your medications with you on the day of your appointment.
- You may eat and drink, but should restrict your intake to a light meal before the procedure.
- If you are taking oral anticoagulant or antiplatelet medication (blood thinners) such as ASA (Aspirin®), Apixaban (Eliquis®), Rivaroxaban (Xarelto®), Edoxaban (Lixiana®), Dabigatran (Pradaxa®), Clopidogrel (Plavix®), Ticagrelor (Brilinta®), or Dipyridamole + ASA (Aggrenox®), you must consult your family doctor about when to stop this medication before your procedure, unless your pain doctor tells you not to, as most procedures require this.
- If you are taking injectable anticoagulant medications (blood thinners) such as heparin, dalteparin (Fragmin®), enoxaparin (Lovenox®), tinzaparin (Innohep®), or fondaparinux (Arixtra®), please consult your pain specialist for direction on when to stop this medication prior to your procedure.
- Take other prescribed medication in the morning with some water.
- If you have diabetes, you will need to remove any blood sugar sensors/transmitters/ receivers or insulin pumps because these items should not be exposed to radiation.

Please visit [WELldiagnostics.ca/test-prep](https://www.welldiagnostics.ca/test-prep) for more information on:

- Epidural Steroid Injection
- Facet Joint Injection
- Sacroiliac Joint Injection
